New Requirements for Roof Replacement Permits Per Florida Statute 553.844

Note: This procedure applies to single family residences constructed prior to the 2001 Florida Building Code (March 1, 2002)

ROOF DECK ATTACHMENT

1. Existing roofing must be stripped to expose the deck for evaluation of the deck nailing
2. Supplemental nailing may be necessary to assure proper attachment
3. A roof deck nailing inspection must be made once the fasteners comply with the nailing requirement specified in the code
4. An additional inspection type will be added:
154 - ROOF DECK NAILING
5. This inspection must be scheduled in the system and an appointment must be scheduled in the same manner as the dry-in in-progress inspection

SECONDARY WATER BARRIER

6. A secondary water barrier method must be used
7. The secondary water barrier must be inspected in the same manner as the current in-progress inspection

AFFIDAVIT

When the Marion County Building Department misses the scheduled appointment for inspection of the roof deck nailing an affidavit provided by the Department may be submitted.

When an affidavit is required it must be received by the Building Department prior to closing the permit.
