SECTION 1 FOREWORD

The Marion County Procurement Code authorizes Marion County to procure goods and services of every description and nature necessary to the operation of County government. The Board of County Commissioners has delegated this authority, through the County Administrator, to the Procurement Services Department.

Therefore, the mission of the Procurement Services Department is to provide any and all goods and services of appropriate quality and quantity, as may be required by County government, in a timely manner, at the least overall cost to the taxpayers. To promote efficiency and effective coordination in the purchase of commodities and contractual services for the County. To provide uniform commodity and contractual service procurement policies, rules, procedures and forms for use by County Departments.

The objectives of County Procurement can be summarized as follows:

1. To purchase goods and services at the lowest total cost consistent with needs, using specifications that will attract wide competition, as appropriate;
2. To maintain required quality standards;
3. To promote standardization and simplification of specifications;
4. To minimize inventory accumulations and the attendant carrying costs;
5. To assure a continuing supply of materials;
6. To support the functions of the various departments and activities of the County;
7. To effect savings through such techniques as volume and cooperative purchasing, value analysis and lifecycle costing, and the use of commercially available items, whenever practical;
8. To administer the procurement process in an open, fair manner and without conflict of interest, other impropriety or the appearance of impropriety;
9. To negotiate, track and administer contracts and agreements of the Marion County Board of County Commissioners and all departments under its purview;

Article Seven of the Marion County Code of Ordinance, commonly known as the Procurement Code, defines the purpose and intent of the Ordinance as:

The Code established a Central Procurement System and ordained that all procurement for goods and services shall be effected through that system. Therefore, no purchase commitment, either verbal or written, shall be made by anyone other than the Director of Procurement Services, staff members of the Procurement Services Department, the County Administrator, the Board of County Commissioners, or others authorized by the Director of Procurement Services or the County Administrator.

One of the main objectives of a Central Procurement System is to achieve savings through the application of efficient management techniques. Under centralized procurement, responsibility rests with an authorized specialist and is not incidental to other operating functions. A specialized effort devoted to coordinating the requirements of various departments and inviting widespread competition results in maximum value in the following ways:

1. Combined volume, which reduces prices;
2. Planned purchases, which reduce the number of small emergency orders;
3. Proper planning and coordination, which results in fewer requisitions, bid invitations, purchase orders and related paperwork;
4. Greater value is achieved through improved specifications;
5. Specifications for similar items used by more than one department may be standardized.

The Procurement Services Department is primarily, a service activity for the operating departments. It is the act of acquiring goods and services at the best possible price, consistent with specified quality. For administration of county contracts and agreements, and reviewing, tracking and balancing of expenditures. Although the Director of Procurement Services is charged with the responsibility of its proper operation, the procurement function, because of its complexity, requires the cooperation of many employees that are not directly involved in the purchasing activity.

Since it is essential that all who are involved in the procurement function be properly informed, this manual has been developed to aid all employees, either directly or indirectly involved with procurement. It is intended to act as a guide to those concerned, outlining their duties and responsibilities so that the County's reputation for fairness and integrity is maintained. The policies and procedures shown in this manual represent current County practices. All users of this manual are invited to present to the Director of Procurement Services, in writing, suggestions for revisions that will improve service to them or the taxpayers.

The act of dividing the procurement of commodities or contractual services, so as to avoid requirements, is not allowed, and is contrary to Florida Statute 287.057 (9). This includes, but

is not limited to, splitting purchase orders, splitting procurement card transactions, or any other method of purchasing an item or group of items or a service or group of services to avoid competitive solicitation or any other requirement of the Procurement Ordinance, Florida State Statute, the Procurement Policies and Procedures Manual or any other applicable law or policy.

The Procurement Services Department will review this manual on an annual basis to determine if revisions are needed. Revisions will be made at the direction of the County Administrator, and upon the recommendation of the Director of Procurement Services.

If the low bid is less than \$50,000, the County Administrator may sign the contract without Board approval. SECTION 5

ACQUISITION OF PROFESSIONAL SERVICES

This section is to ensure that Marion County is in compliance with Section 287.055, Florida Statutes, the “Consultants’ Competitive Negotiation Act” (“CCNA”). In addition, this is designed to establish guidelines, for the use by County staff, for making recommendations to the Board of County Commissioners (BOCC) for engaging architects, landscape architects, professional engineers and registered surveyors and mappers for professional services that are required for County projects.

Many professional services such as accountants; physicians; attorneys; etc. do not come under the jurisdiction of the CCNA. Some other services may be exempt from CCNA requirements because they are under the threshold statutory requirements. For these non-CCNA professional services, CCNA procedures will generally be followed. However, the County Administrator or his/her designee, for any non-CCNA required professional service, may use any of the following selection methods:

- a. Competitive bidding
- b. Competitive negotiation
- c. Request for qualifications
- d. Request for proposal
- e. Request for information
- f. Any other method allowed or permitted by law ensuring the County selects the most qualified firm at the lowest cost.

EXCEPTIONS:

Due to the highly specialized nature of selecting outside counsel to represent the County and the selection of expert witnesses and consultants to either testify or assist in litigation, these services will be selected by the County Attorney, who will not be required to follow these procedures. Nevertheless, in selecting outside counsel and other litigation experts, the County Attorney should be mindful of the costs involved and should strive to select those firms and individuals who are the most qualified and who can provide the requested services to the County at the lowest cost.

SECTION 6 CONTRACTS

Contract administration is established to coordinate the management of delivery of goods and services; the relationship with contractors, which include, consultants, suppliers, developers, and government agencies; and the management of the risks associated with the performance of the contract and future changes in contract requirements. Contract Administration will ensure that there are good communication channels at all levels in both organizations; between the County and contractor; between contract administration and the contractor's managers; and between the users of the service and the contractor's operational staff. Contract administration is the process which ensures that both parties to a contract fully meet their respective obligations as efficiently and effectively as possible, in order to deliver the business and operational objectives required from the contract, and in particular, to provide value for money.

OBJECTIVES OF CONTRACT ADMINISTRATION:

- a. Ensure that the performance of the contractor and the quality of the services provided are as specified in the contract.
- b. Confirm that the benefits from the contract are being achieved, and, in particular, that value for money is being obtained.
- c. Identify the requirements for changes to the contract in response to the changing demands of the market and the end user, and to plan and manage the introduction of those changes.
- d. Anticipate problems and resolve issues that may arise from the operation of the contract.

CONTRACT ADMINISTRATION FUNCTIONS:

- a. Monitors progress of contractors for conformity and legal restraints through review of written reports, site visits and personal contact.

Confers with contractors, professional consultants (architects and engineers), staff, and Department Directors as necessary to ensure that the contract requirements are being adhered to.

- k. Assures proper signatures are obtained on all binding legal documents.

DISPUTE RESOLUTION

Procedures for dispute resolution cover the roles and responsibilities of the individuals within the County, who will be tasked with resolving any problems as they arise. Procedures for escalation to Administration and the County Attorney will be clearly laid out with the rationale for the trigger points requiring reporting upwards. Minor problems should be resolved by the department or project manager before they become major issues.

Dispute Resolution Procedures:

- a. The Project Manager/End User are responsible for documenting any issues with the contractor as they arise.
- b. If issues cannot be resolved at the Department Level, a meeting between the Project Manager/End User and Procurement Services Department must take place to determine the next best course of action. Contractor must be notified in writing by Procurement Services Department, of the dispute and will be given a time period to resolve the conflict. Contractor notification of the dispute must be copied to the Project Manager/End User, Department Director and Assistant County Administrator.
- c. If a written notification of a dispute has been sent to the Contractor and the dispute has not been resolved within the specified time period, a meeting may be called to determine the next course of action. The meeting will be set up by Procurement Services Department and notification of the meeting will be sent to the Contractor, Project Manager/End User, the Department Director and the Assistant County Administrator. Legal and Administration will be notified if applicable. The initial meeting may be internal only or may involve the Contractor, depending on the type and the severity of the dispute.
- d. The meeting will be documented and a letter or email from Procurement Services Department will be sent to the Contractor outlining the items discussed in the meeting and the course of action agreed upon. The letter will be copied to the Project Manager/End User, Department Director, Assistant County Administrator, and Legal.

- e. If, after following all of the above procedures, the dispute cannot be resolved, there must be an internal meeting to discuss the next course of action. The meeting may include, Project Manager/End User, Department Director, Assistant County Administrator, Legal and Administration. This meeting will be documented by the Procurement Services Department. A determination of contract termination recommendation may be made at this meeting. Contract termination may also involve liquidated damages, and bond issues which must be resolved prior to a contract termination recommendation being brought to the Board.
- f. If all avenues of dispute resolution have been exhausted and a decision to recommend a termination of contract has been made, the following will apply:
If contract was approved by the Board of County Commissioners, an agenda item must be prepared outlining the actions taken and the justification for termination. This agenda item will be presented to the Board of County Commissioners for final action. A letter must be sent by Procurement Services Department to notify the Contractor of the recommended action and the date of the Board meeting. This letter must be copied to the Project Manager/End User, Department Director, Assistant County Administrator, Legal, and Administration.
If the contract was executed by the County Administrator, a notice of intent to terminate must be sent to the County Administrator along with the reasons for termination. The County Administrator must approve the intent to terminate in writing.

The above mentioned procedures are not meant to disallow any additional meetings, correspondence, or other means necessary to attempt to resolve a contract dispute.

CONTRACT REVIEW AND CLOSEOUT

Contract performance will be reviewed comprehensively at intervals appropriate to the goods or services provided. These reviews are essential for detecting potential problems at an early stage and may include:

- i. Levels of contractor satisfaction;
- j. The extent to which value for money is being achieved;
- k. Opportunities to reduce costs, improve service or procedures

SECTION 7 PURCHASING THRESHOLDS

Although Competitive Sealed Bidding is the procedure universally preferred in governmental procurement, consideration of the time and cost involved dictates that a less formal procedure be used for small purchases. The Procurement Code provides that procurements under \$50,000 may be made in the open market without formal bid. The Code further provides that these procurements, when practicable, shall utilize competitive oral or written requests for quotes.

PROCEDURES:

The following are the guidelines to be used for formal and informal quoting:

- a. \$2,500 or below -- Purchase through purchase order or procurement card as per procurement card guidelines and procedures manual.
- b. \$2,500.01 to \$9,999.99 -- Department shall request three (3) or more written quotes which can include but is not limited to copies of internet pricing from vendors (must utilize the Local Business Directory in notifying vendors of quote opportunities). With written documentation as to vendor name and price quoted, receive approval of Department Director or authorized designee by purchase order or procurement card.
- c. \$10,000 to \$49,99.99 -- Department shall request, in writing, that the procurement services department solicit written quotes from vendors using county vendor files and the Local Business Directory files. Department shall request a requisition or utilize procurement card and receive prior approval from Department Director and Assistant County Administrator or their authorized designee.
- d. All purchase orders \$50,000 and over shall be approved by the Department Director, their Assistant County Administrator authorized designee, and Board of County Commissioners at a regularly scheduled meeting under the Procurement Services Department agenda.

If the Procurement Services Department, or any other department, foresees a need for products or services of a like or similar nature, costing \$50,000 or more in aggregate within a fiscal year, it may recommend Competitive Sealed Bidding, even though the products and services individually may be under the \$50,000 bid threshold. Vehicle repair and maintenance work, road repair and maintenance work, those commodities which cannot be managed by Competitive Sealed Bidding and subject to daily/weekly market price fluctuations, are exempt from this requirement.

Departments with Countywide responsibility for commodities or services may combine requirements for like or similar commodities that are expected to be needed in the near future (usually a fiscal year), and arrange for Competitive Sealed Bidding.

When previous experience indicates a reasonable expectation that combined requirements from all Departments for a commodity or service will exceed the bid threshold within a fiscal year, the Procurement Services Department may solicit requirements from all users of this

commodity or service, for specifications and bid documents to be developed and arranged for Competitive Sealed Bidding.

In order to reduce the number of small procurements required, along with the consequent paperwork generated, Open Purchase Orders that specify not to exceed certain amounts may be used whenever practical. Emergency procurements are exempt from the provisions of this procedure. An explanation of the reasons for the emergency shall be documented in the quote file maintained by the Procurement Services Department. This provision shall be used only if there is imminent danger to the health or welfare of the citizens of the County, or if there is a threat of deterioration of a critical service as approved by the County Administrator or their designee.

Where only one source exists for a required commodity or service, it shall be approved as a sole source by the Board of County Commissioners. If the purchase, or future purchases, will not exceed \$50,000 in a fiscal year, the County Administrator may approve, and it will be documented by the Procurement Services Department.

On occasion, good business judgment may dictate deviations from the procedures outlined in this section. In this instance, the reason(s) for the deviation shall be approved by the Director of Procurement Services, or his/her designee, and shall be documented in the quote file. Such deviations shall not violate any requirement of the Procurement Code.

INVOICE APPROVAL/REQUEST FOR PAYMENT

All invoices with a request for payment must be approved by the requesting department's director, Assistant County Administrator, (if \$25,000 or more), and the Procurement Services Department, prior to sending to Finance for approval. The only acceptable invoices without a corresponding purchase order will be for emergency purchases, purchases made by procurement card, membership or subscription fees, utility payments, and any other purchase not requiring a purchase order.

All invoices paid by procurement cards, that are \$25,000 or more for a single purchase, must have prior written approval by the Assistant County Administrator. Purchase of capital items using the Procurement Card, must follow the procedures as outlined in sections 7 and 9 of the Procurement Manual.

Some items may require prior approval of another department, prior to purchase. Any item such as software or hardware connecting to a county computer must have prior approval of the Information Technology Department. Vehicles and some large equipment must have prior approval from the Fleet Department. New construction or renovation projects including new furniture purchases may require prior approval from Facilities Management.

CAPTIAL PURCHASES

Capital purchases are for equipment with a value of one thousand dollars (\$1,000) or more, with an extended life of five years. These capital items are listed in each fiscal year's budget and are Board approved. The request for a capital purchase can only be made when it is an identified line item in the budget. Any capital purchase request that is not listed in a line item budget, must have the written approval of the County Administrator. If the cost of the additional capital item is fifty thousand dollars (\$50,000) or over, or is a vehicle at any price threshold, it will require additional approval by the Board of County Commissioners.

When a request for a capital purchase is sent through as a bid or a requisition request, the department on the requesting form must identify the specific line from the budget. For all capital equipment purchases, an acquisition form must be filled out and sent through with the invoice for payment.

SECTION 8 CHANGE ORDERS

A change order is a written order amending a Purchase Order to correct errors, omissions, or discrepancies, to cover acceptable cost over-runs and freight costs, to incorporate requirements to expand or reduce the scope of goods or services ordered, or to direct other changes in the contract execution to meet unforeseen field, emergency, climatic, regulatory, or market conditions, and to track contingency expenditures if applicable.

DESCRIPTION

A written change order is required when a project has changes to the scope of work, exceeds the number of days for substantial or final completion, has a change in contract price, or when contingency is used. Change orders to purchase orders where the purchase order does not contain a contingency amount, must be submitted in writing to the Procurement Services Department on a County change order form. At that time, the contingency will be added to the purchase order per Procurement Code.

Contingency may be used for any construction or construction related project and added to the purchase order for up to ten percent of the project/construction cost. Road projects may include a higher contingency up to twenty percent of the construction cost.

If direct purchasing is being utilized in connection to a construction project, a deduct change order to the contractor, in the amount of the direct purchase, including sales tax, shall be made through a written change order prior to the direct purchase order being issued.

If the project is unable to proceed without the approval of a change order, the County Administrator has the authority to approve the change order and bring it before the Board at the next regularly scheduled meeting, with documented explanation of the condition.

All change order causing the purchase order to meet or exceed twenty-five thousand dollars (\$25,000) must have Assistant County Administrator approval. All purchase orders, excluding open purchase orders, which are fifty thousand dollars (\$50,000) or over, must have Board approval. If a change order causes a purchase order to be at or over \$50,000, it must have Board approval, except in certain cases where the Board has approved hourly or itemized rates on an ongoing contract.

If applicable, a change order should be sent through, prior to final payment, in order to fully account for any over-runs or quantity adjustments that indicate final quantities and costs for project close-out.

PROCEDURE

Written Change Orders:

1. Any change order must be submitted in writing to the Procurement Services Department on a County change order form.
2. Using the change order form located on the Procurement Services Department intranet portal. All necessary and applicable fields must be filled out.
3. The Department Director and Project Manager must sign the form and send to Administration, if applicable, for signature.
4. Administration will then forward the change order to the Procurement Services Department for signature and processing.
5. If Finance approval is required, the Procurement Services Department will obtain written approval prior to processing.
6. If the change order does not exceed the contingency amount, or does not change the scope of work or contract amount, the Procurement Services Department will process and sign the change order and distribute a copy to the vendor and Finance.
7. If the change order exceeds the contract amount or exceeds any contingency allowed for by Ordinance, or if the change order causes the original purchase order to meet or exceed \$50,000, the Procurement Services Department will prepare an agenda item for the next available Board meeting.
8. Once the change order is fully executed by the Chairman of the Board of County Commissioners, and attested to by the Clerk of the Court, if applicable, the Procurement Services Department will process and distribute the fully executed change order to the vendor, Finance and to Administration (if applicable).

The following procedures must be followed for fuel purchases on a fuel card:

1. The receipt for fuel must be clear and must only be for fuel. No other purchases will be allowed on the fuel cards.
2. Receipts must be signed by the purchaser. The purchaser must sign and clearly print and sign their name, date of purchase, mileage and the unit number on the receipt.
3. The Department representative will code the receipt and forward it to the Procurement Services Department, within forty-eight hours of purchase. Director or designee will approve each purchase in the electronic system per the normal process.
4. Fire/Rescue personnel utilizing Fuel Cards must refer to the process outlined in the information bulletin, issued by Fire/Rescue dated, May 1, 2017.

Failure to follow the above procedures could result in disciplinary action, as outlined in section 9.4 (c) – Misuse of Card.

MERCHANT SIGN-UP

It is important to the success of the PROCUREMENT CARD Program, that merchants interested in doing business with Marion County via the PROCUREMENT CARD, receive assistance in doing so. If merchants currently accept VISA credit cards, they are already equipped to accept Marion County's PROCUREMENT CARD. A merchant who is not currently accepting VISA credit cards. should contact the bank's merchant service provider.

PURCHASE DENIED AT POINT OF SALE ("SWIPE") MACHINE

1. On occasion, a Cardholder may attempt to purchase items from a merchant, and the purchase may be denied. In most cases, the information regarding the reason for denial will be available the day after the purchase is attempted. Some of the most common reasons for denial are as follows:
 - a. The cardholder has attempted to make a purchase from a merchant whose Merchant Category Code (MCC) is not authorized under the Agency or Cardholder's profile. The bank monitors PROCUREMENT CARD usage and any attempts to purchase goods/services from blocked merchants, are reported to the PCPC.
 - b. The purchase from the merchant may be greater than the Cardholder's single transaction limit. The purchase from the merchant may place the Cardholder over the authorized daily, monthly or cycle limit.

RECORD KEEPING

Itemized Merchant Sales (charge) receipts (i.e., purchase documentation that identifies the items purchased and the amount paid for each item) and any other back-up material is kept and filed with the reconciliation documents. Other documentation may include shipping documents and bills of lading. All documents and records must be maintained in accordance with appropriate Florida laws.

TAXES

1. Purchases made in Florida and for use in Florida are exempt from Florida Sales and Use taxes. The County's tax-exempt identification number is printed on the face of each PROCUREMENT CARD, and should be sufficient information for the merchant to honor the tax-exempt status of the PROCUREMENT CARD.
2. Purchases made in other states are generally subject to that state's sales tax. Examples include supplies purchased either while traveling, or for use in that state.
3. As with all County purchases, the Cardholder must be diligent when dealing with the merchant regarding taxes. The Cardholder will be unable to dispute taxes charged since the PROCUREMENT CARD Issuing Institution cannot process a charge back to the merchant for taxes. The Cardholder may be responsible for securing a credit or payment of taxes, if required.
4. Purchases made from a foreign country are subject to a foreign currency exchange fee, and are the responsibility of the cardholder/department.

SECTION 19 CONCLUSION

Government entities funded by public money require rigid and complicated procedures, resulting in complex systems. In order to ensure that public funds are well spent, and to aid in maintaining the credibility of the public entity, these systems and procedures must be documented and audited periodically. The procurement system is subject to public scrutiny and is accountable to external as well as internal reviews.

This manual documents the systems and procedures used by Marion County managers and employees in the procurement of goods and services; they are invited to address suggestions for improvements to the manual, or any part of the system, to the Director of Procurement Services. This will ensure that Marion County will maintain an efficient procurement system that is responsive to the needs of all the users of the system.
