*****FOR IMMEDIATE RELEASE*****

Do it yourself with the help of your library's website

If you prefer to fix your own car, do your own home improvement work, or repair your small engine equipment, you will be pleased to learn that assistance is now a mouse click away. Just go to the Marion County Public Library's website at <http://library.marioncountyfl.org> and look at the listing on the right side of the page. Among the many databases and listings we have available, you will see three new ones:

- **Auto Repair Reference Center** - covers automobiles from 1945 to 2007 and provides information such as wiring diagrams, troubleshooting assistance, and almost everything you need to get your car on the road safely and efficiently.
- **Home Improvement Reference Center** - can show you how to build a deck, install a ceiling fan, fix a leaky faucet, and so much more
- **Small Engine Repair Reference Center** - with the help of this center you can fix all-terrain vehicles, motorcycles, generators, and other items with manufacture dates for most items from the 1970s to the present.

These reference centers can be accessed from any computer with an Internet connection. If you're at work or at home, you will need your Marion County Public Library card number, that's all. Conquer those "do it yourself" projects anytime, anywhere.

For additional information, call the Information Services Division at (352) 671-8551.
