

S2401 OCCUPATION BY SEX AND MEDIAN EARNINGS IN THE PAST 12 MONTHS (IN 2014 INFLATION-ADJUSTED DOLLARS) FOR THE CIVILIAN EMPLOYED POPULATION 16 YEARS AND OVER

2010-2014 American Community Survey 5-Year Estimates

Note: This is a modified view of the original table.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Marion County, Florida				
	Total	Male	Female	Median earnings (dollars)	Median earnings (dollars) for male
	Estimate	Estimate	Estimate	Estimate	Estimate
Civilian employed population 16 years and over	116,660	50.7%	49.3%	26,409	30,228
Management, business, science, and arts occupations:	31,557	44.2%	55.8%	43,365	51,612
Management, business, and financial occupations:	11,615	55.8%	44.2%	47,153	55,656
Management occupations	8,733	60.3%	39.7%	50,048	56,295
Business and financial operations occupations	2,882	42.0%	58.0%	44,004	50,703
Computer, engineering, and science occupations:	2,177	84.1%	15.9%	46,265	46,954
Computer and mathematical occupations	915	81.9%	18.1%	60,168	60,933
Architecture and engineering occupations	832	93.8%	6.3%	44,225	44,261
Life, physical, and social science occupations	430	70.2%	29.8%	44,653	43,796
Education, legal, community service, arts, and media occupations:	9,122	34.8%	65.2%	37,574	41,110
Community and social services occupations	1,597	44.6%	55.4%	38,288	37,660
Legal occupations	950	23.4%	76.6%	38,833	96,875
Education, training, and library occupations	5,304	28.1%	71.9%	38,258	41,894
Arts, design, entertainment, sports, and media occupations	1,271	58.9%	41.1%	21,410	32,198
Healthcare practitioner and technical occupations:	8,643	28.6%	71.4%	49,089	66,463
Health diagnosing and treating practitioners and other technical occupations	5,370	32.2%	67.8%	61,817	82,500
Health technologists and technicians	3,273	22.8%	77.2%	33,269	31,373
Service occupations:	28,532	45.0%	55.0%	17,515	20,667
Healthcare support occupations	3,674	12.2%	87.8%	21,826	26,845
Protective service occupations:	3,733	70.6%	29.4%	34,925	36,352
Fire fighting and prevention, and other protective service workers including supervisors	1,331	83.3%	16.7%	20,031	22,031
Law enforcement workers including supervisors	2,402	63.6%	36.4%	37,182	42,500
Food preparation and serving related occupations	9,481	40.8%	59.2%	13,851	15,035
Building and grounds cleaning and maintenance occupations	6,955	62.8%	37.2%	16,016	18,509
Personal care and service occupations	4,689	32.5%	67.5%	18,281	22,620
Sales and office occupations:	32,890	36.4%	63.6%	24,602	27,712
Sales and related occupations	15,933	49.7%	50.3%	22,233	32,279
Office and administrative support occupations	16,957	24.0%	76.0%	25,611	23,818

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic

entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
