Capacity Plan

Marion County Community Services in partnership with Boys & Girls Club of Marion County will work with Southern Heritage Developers LLC, to complete all construction needs for the facility. Southern Heritage Developers LLC was chosen for this project, after review of their construction credentials, as well as their ability to meet general proposal budget and timeline requirements by the grant application deadline. It is important to note that upon approval of this project, there will need to be further design and development by architect and engineer. Upon preliminary approval of this project a final budget can be determined.

Boys & Girls Club Administrative Staff, led by the CEO, will be responsible for providing access and site related support, as well as managing the invoice submission during the construction period.

The Board Led Financial Committee will oversee construction draws and disbursement of funds.

Once the construction is completed, the Boys & Girls Club of Marion County will partner with the local health Department and the Emergency Operations Command Center to operate the shelter as needed.

Marion County Community Services Department will manage the application submission on behalf of Boys & Girls Club of Marion County, Inc and administer the awarded funds for each general infrastructure project according to accepted budget plan. Community Services will also oversee project progression, ensure compliance with Florida Department of Equal Opportunity (DEO) and United States Department of Housing and urban Development (HUD) guidelines, provide updates to DEO and HUD on project completion and met objectives, and the review and payment of invoices.
